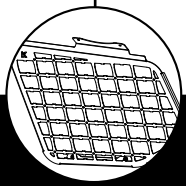
It all works together.

All our storage products work together, but there is a certain order to installing.
Let's work out the best order for your setup, shall we?



Are you installing a Side Molle Panel?

YES

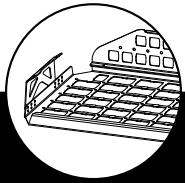
Install the Molle Panel as per it's instructions. Now's the time to mount any additional accessories to the Molle as well.

Are you installing other KAON Storage Products?

NO

Complete the Molle Panel as per it's instructions.

NO



Are you installing a Standalone Shelf?

YES

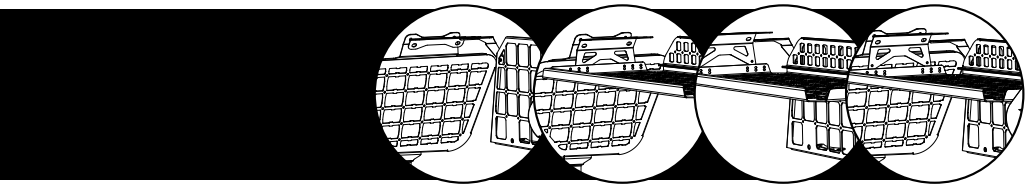
Follow the Shelf fitting guide. Complete the Shelf & Molle install.

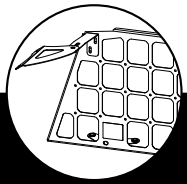
Are you installing other KAON Storage Products?

YES

NO

That's it, you're done!





Are you installing a Light Cargo Barrier?

NO

YES

The last piece of the puzzle, complete your install by following the Light Cargo Barrier fitting guide.

Are you installing other KAON Storage Products?

YES

NO

That's it, you're done!

YES

With the foundation in place, it's time to mount any other accessories, such as a Cargo Divider, Travel Buddy, etc. Have fun making it your own.

With your setup order sorted, let's get to the good part: installing. →

Let's get to work.

Preparing the Vehicle

1. Whether you're starting from a factory rear, or with existing KAON accessories, we need to start from a blank slate. Remove the rear grab handles by prying open the plastic cover and removing the bolts with a socket.

Installing the Molle Panels

2. Ensure you have the correct panel for each side. The 'K' on each panel should be oriented at the front of the vehicle.
3. Now is the easiest time to attach any accessories such as pouches, electrical components, or storage pods to your Molle Panels.

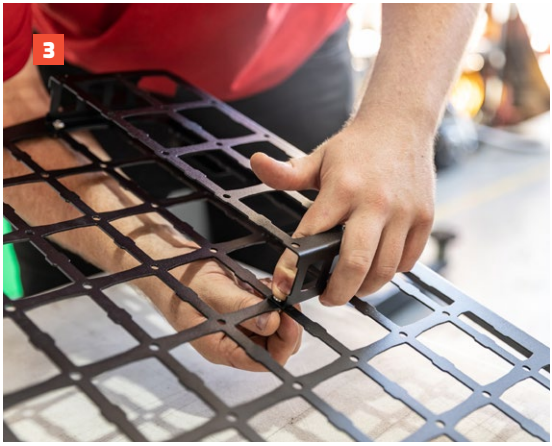
Thread the handle mounts over the rear grab handles, ensuring molles are oriented as pictured.

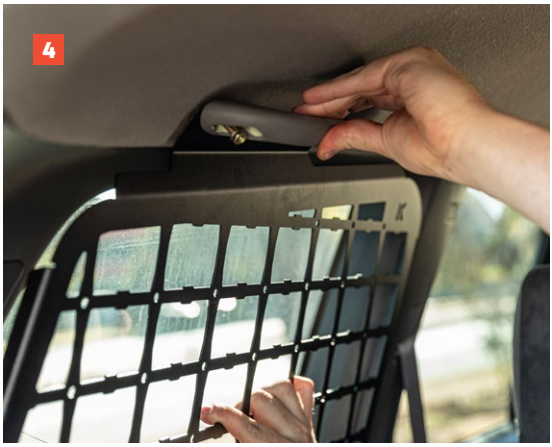
If you're installing with a Standalone Shelf: their handle brackets should be sandwiched between the Molle Panel and factory handles at this stage.

If you're installing with a Barrier and/or Barrier Shelf: their handle brackets should be sandwiched between the Molle Panel and factory handles at this stage.

Shelf Brackets should be layered over the Molles, and Barrier Handle Brackets last, paying attention to the correct orientation as per their instructions.

4. Secure using the factory handles and hardware. Tighten the bolts to secure and reclip the plastic cover.





Finishing the Install

5. Apply gentle pressure to the molle panel so it sits flush against the interior trim.
6. Ensure the spacing around the Molle Panels is even and correct.
7. Use a 3mm bit to carefully drill the three lower mount holes.

   Depending on preference, you can drill without removing the panel. Otherwise mark the placement and remove the panel to drill.
8. Secure the molle to these holes using the supplied self tapping screws and washers.
9. Repeat for the other side.
10. That's it, you're done! If you are installing a Shelf or Light Cargo Barrier with your panels, continue with the instructions in their fitting guides.
