Bolt Torque

DIAMETER (mm)	5mm	6mm	8mm	10mm	12mm
NEWTON-METRES (Nm)	5 Nm	9 Nm	22 Nm	44 Nm	77 Nm

Let's get to work.

Preparation

1. We want a nice clean starting surface, so remove any dirt and debris from the mounting surfaces on the shock absorber mount.
2. It's worth noting that removal of the existing guards is **not required**.

Installation

1. Position the guard over the shock absorber and check clearance with any existing guards. BP51 plastic guards may need a slight trim to the bottom of the plastic guard.
2. Using the M10 bolts, washers and nut blocks, loosely install the bottom mounts on each side.
3. Line the wired nut block up with the top hole, and loosely install with the M8 bolt as shown in image 3.
4. Position the guard and torque all bolts to required torque as per table.

Local Knowledge & Assistance

We know half the fun of building your dream 4x4 is getting your hands dirty. But we also know that sometimes, things don't go to plan. If in the pursuit to build the ultimate setup you find yourself off-track, we're here to help you get unstuck.
