# It all works together.

All our rear door products work together, but there is a certain order to installing.  
Installing multiple products? Here's the the best way for your configuration.

With the order sorted, let's get to the good part: installing. →

# Let's get to work.

## Preparation

1. If you already have a KAON Rear Door Table installed, remove the table to gain access to the 3 lower mounting holes on the cage.

If you are installing the Caddy, we recommend doing that first.

2. Remove plastic panel cover.
3. Position the cage as shown and check for clearance to the rear door table.
4. With a pencil, mark the position of the upper left and right holes.

## Installation

5. Using a 3mm drill bit, carefully drill the the plastic trim at the positions marked.
6. Install the two top self tapping screws. **DO NOT OVER TIGHTEN**
7. Drill 3mm pilot holes for the 3 lower screw positions.
8. Install the self tapping screws.
9. If you had a Rear Door Table previously, ensure it is reinstalled as per it's instructions.
10. That's it, you're done!
