It all works together.

All our storage products work together, but there is a certain order to installing.
Let's work out the best order for your setup, shall we?

With your setup order sorted, let's get to the good part: installing. →

Let's get to work.

Preparation

1. Remove the rear row grab handles by prying off the plastic cover and removing the bolts with a 8mm socket.

Bracket Installation

2. Place the handle brackets under the handles and reattach the handle brackets using M6 flanged bolts.

This handle bracket also has nutserts for mounting the Light Cargo Barrier, should you choose to do so.

If you're installing with Side Molle Panels: follow the instructions in the Side Molle Panel instructions, then proceed to step 3.

Assembly

3. Attach the rear fence to the shelf using M5 nuts and bolts.

Shelf Installation

4. Position the shelf and attach to the handle brackets using M6 flanged bolts and nuts.
5. Once the shelf is in the desired position, tighten all bolts securely.
6. That's it! Your new shelf is able to hold a recommended maximum load of 10kg. It also has some handy hooks to hang bags, and twin bottle openers on each side.

Bolt Torque

DIAMETER (mm)	5mm	6mm	8mm	10mm	12mm
NEWTON-METRES (Nm)	5 Nm	9 Nm	22 Nm	44 Nm	77 Nm

Local Knowledge & Assistance

We know half the fun of building your dream 4x4 is getting your hands dirty. But we also know that sometimes, things don't go to plan. If in the pursuit to build the ultimate setup you find yourself off-track, we're here to help you get unstuck.
