Bolt Torque					
DIAMETER (mm)	5mm	6mm	8mm	10mm	12mm
NEWTON-METRES (Nm)	5 Nm	9 Nm	22 Nm	44 Nm	77 Nm

Let's get to work.

Installation

1. Loosely attach the smaller clamping plate to the main bracket using an M8 bolt and washer as pictured.
2. Work out the desired placement of the brackets in relation to your awning and roof rack. Depending on your setup, you may wish to run the bracket facing up or downwards.
3. As all the hardware is Stainless Steel, we highly recommend placing some anti-sieze compound into the Clamp threads.
4. Align the clamp with the edge of the roof rack, ensuring the clamp is seated correctly in the dovetail join, flush against the roof rack. Ensure there are no gaps and that the clamping flanges are positively engaged on the dovetail. Tighten using a hex key.
5. Repeat for the remaining brackets.
6. Secure your awning to the brackets. Due to the sheer number of awning variations, we can't supply the hardware for this. So if you don't have the required hardware on hand, a trip to the shops may be in order.
7. That's it! All that's left to do is to head to the beach, open your awning and enjoy the shade.
