Local Knowledge & Assistance

We know half the fun of building your dream 4x4 is getting your hands dirty. But we also know that sometimes, things don't go to plan. If in the pursuit to build the ultimate setup you find yourself off-track, we're here to help you get unstuck.

For further information call 07 3180 1470 or email info@kaon.com.au

Let's get to work.

Installation on SMEV Stoves

1. Remove the burners wire support rack, it should easily lift upwards out of it's mounting holes.
2. Place the windshield inside the burner recess, aligning the tabs with the grid spacing, as pictured.
3. Reinstall the wire support rack over the top. The rack will lock the windshield tabs in place.

Installation on Dometic Slide Out Kitchen Stoves

1. Remove the wire support rack above the burners. You will need to release it from its mounting pins by pulling it to the left, before lifting it out.
2. With the dual-tabbed side of the windshield facing upwards, place the windshield/s over the burner, and position it slightly towards the left, as pictured. Loosely orient the locating tabs to where they will take up the wire rack positioning.
3. Lower the the wire support rack over the top of the windshield/s, locating the windshield tabs in the process. Pull both the rack and the windshields across to the right, until the rack clips onto the stoves mounting pins.
