## Let's get to work.

### Installation

1. We want a nice clean starting surface, so remove any dirt and debris from the mounting surfaces.
2. Loosen, but do not remove, the rear factory bolt connecting the fuel filter to the chassis.
3. Remove the front inner bolt on the fuel filter, and set aside.
4. Slide the guard over the fuel filter in the orientation pictured, positioning it so it is sandwiched between the rear bolt and the chassis.

### Installation cont.

5. Replace the factory bolt removed in step 3.
6. Whilst propping up the guard so that it sits flush on the mounting points, tighten all bolts until completely secure.
7. That's it, you're done!  
All that's left to do is hit the tracks with peace of mind that your fuel filter is protected.
