G8.8 Bolt Torque (Non-Lubricated)

DIAMETER (mm)	5mm	6mm	8mm	10mm	12mm
NEWTON-METRES (Nm)	6 Nm	10 Nm	15 Nm	22 Nm	35 Nm

Let's get to work.

Installation

1. Remove the head rests and slide on the head rest brackets, as pictured. For the brackets to be in the correct orientation, the double folded end should be facing downwards on the headrest, and the nutserts should be facing toward the rear of the vehicle.
2. Re-install the head rests with brackets in place.

Installation cont.

3. Position the barrier against the head rests. The flanged edge on the barrier should be directed forwards, and the warning stickers should be visible from the rear of the vehicle. The openings on the barrier should be aligned with the nutserts on the head rest brackets.
4. Secure the barrier's position by attaching it to the headrest brackets using the supplied M10 hardware. Tighten until secure.
5. That's it - you're done!
The barrier can be quickly removed by simply lifting out the head rests.

Local Knowledge & Assistance

We know half the fun of building your dream 4x4 is getting your hands dirty. But we also know that sometimes, things don't go to plan. If in the pursuit to build the ultimate setup you find yourself off-track, we're here to help you get unstuck.
