G8.8 Bolt Torque (Non-Lubricated)					
DIAMETER (mm)	5mm	6mm	8mm	10mm	12mm
NEWTON-METRES (Nm)	6 Nm	10 Nm	15 Nm	22 Nm	35 Nm

Let's get to work.

Installation

1. Ready to make a great BBQ even better? First off, make sure you've got the tool you need to do the job: either a T30 Torx or a large flat-head screwdriver should do the trick. A cheeky beer (or drink of your choice) wouldn't hurt either.
2. Next, loosen off the top bolt on the legs. You don't need to take it all the way out, just enough so that you can insert the stub shafts into the hinge holes.
3. Gentle pull the leg slightly forward, just enough that you can push the side table into the holes. Once the stub shaft is correctly seated in the hole, check that the table pivots freely up and down.

Installation cont.

4. Now all you need to do is tighten the bolt back up, and check that the tables fold in, lay flat and that the lid closes with ease above them. Repeat steps 2–4 for the other side.
5. You're ready to get cooking! So, what's for dinner?

Local Knowledge & Assistance

We know half the fun of building your dream 4x4 is getting your hands dirty. But we also know that sometimes, things don't go to plan. If in the pursuit to build the ultimate setup you find yourself off-track, we're here to help you get unstuck.
