It all works together.

All our storage products work together, but there is a certain order to installing.
Let's work out the best order for your setup, shall we?

Are you installing a Large Side Molle Panel?

YES

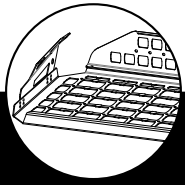

Assemble the Molle Panel as per it's instructions. Now's the time to mount any additional accessories to the Molle as well.

Are you installing other KAON Storage Products?

NO

Complete the Molle Panel as per it's instructions.

NO

Are you installing a Rear Roof Shelf?

YES

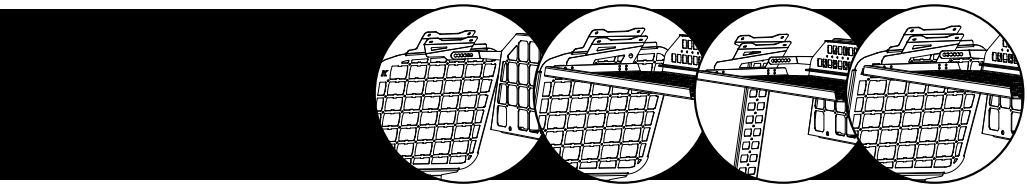

Follow the Shelf fitting guide, selecting the relevant Side Molle option for your setup. Complete the Shelf & Molle install.

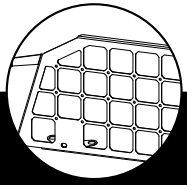

Are you installing other KAON Storage Products?

YES

NO

That's it, you're done!

Are you installing a Light Cargo Barrier?

NO

YES

The last piece of the puzzle, complete your install by following the Light Cargo Barrier fitting guide.

Are you installing other KAON Storage Products?

YES

NO

That's it, you're done!

YES

With the foundation in place, it's time to mount any other accessories, such as a Cargo Divider, Travel Buddy, etc. Have fun making it your own.

With your setup order sorted, let's get to the good part: installing. →

Let's get to work.

Assembling the Large Molle Panel

1. Ensure you have the correct foot for each Molle Panel before assembling. To check you have the correct corresponding Molle Panel, confirm that the foot profile match the base of the panel, and that the holes align.
2. Attach each foot to it's Molle Panel, using the provided M6 bolts and nuts.
3. Tighten all bolts to secure.

If you're installing the Molles on their own or with a Light Cargo Barrier:

4. Loosely attach the provided handle bracket to the Molle Panel using the M6 bolts. The handle bracket should fold forward, in the same direction as the Molle Panel feet.

If you're installing with a Standalone Shelf:

5. Set the handle bracket included with the Molle Panels to one side for safe keeping. A replacement handle bracket is included with the shelf.

Preparing the Vehicle

6. Pry open the plastic covers on the rear grab handles with a small flat-blade screwdriver or trim tool.
7. Use a 10mm socket to remove the rear handles. Set aside.

Installing the Molle Panel

8. Ensure you have the correct panel for each side. The 'K' should be positioned at the back of the vehicle. If you're intending on mounting anything to the Molle Panel, it's easiest to do it now.
9. Place the feet of the Molle Panel into the rear cupholders. The feet are contoured to fit, and the rubber stoppers will keep it secure.
10. Align the handles with the cutouts in the brackets. Align the bolts and locating pins with the holes in the roof, and reinstall by tightening to secure.
11. Make any necessary adjustments to the panel. While applying downwards pressure to the panel, tighten all bolts.
12. Repeat on the other side.
13. That's it, you're done!

G8.8 Bolt Torque (Non-Lubricated)					
DIAMETER (mm)	5mm	6mm	8mm	10mm	12mm
NEWTON-METRES (Nm)	6 Nm	10 Nm	15 Nm	22 Nm	35 Nm

Local Knowledge & Assistance

We know half the fun of building your dream 4x4 is getting your hands dirty. But we also know that sometimes, things don't go to plan. If in the pursuit to build the ultimate setup you find yourself off-track, we're here to help you get unstuck.
